

November 2019 Update

Here is a brief update regarding the reconfiguration plans:

As we continue the gradual reconfiguration of our clinical services (over two sites), we have decided to retain ownership of The Grange for at least the next few years. This will enable us to continue to run the dispensary, and hopefully will facilitate continuation of the current dental service. We are still exploring the possibility of renting out space to other health-related services in the future and will of course keep you posted.
